4 November 2020

To whom it may concern,

Mr Enda Flynn is a graduate of the programme DT205 'BSc in Mathematical Sciences (Honours)'. This full-time 4 year programme (240 ECTS) is at level 8 of the National Framework of Qualifications. Enda completed his studies in May 2020. I had frequent interactions with Enda in my capacities as the subject lecturer in statistics over the 4 years of Enda's studies, as Chair of the programme committee for the Mathematical Sciences degree during that period and as the Year Tutor for the final stage of the degree.

Enda is a pleasant person with outstanding intellectual and analytic abilities. He is hard working and well organised. Enda graduated at the top of his class with 1st class honours. He was the 2020 winner of the John Forde medal which is awarded to the student achieving the highest mark in the Mathematical Sciences degree programme.

Enda undertook his final year project in the area of financial mathematics with the title 'Affine term structure models'. His performance on this challenging project was highly commended by the examiners and this work was awarded a grade in the 'outstanding' range.

I have no reservations about Enda's ability or motivation to undertake and succeed in a demanding postgraduate programme. In my opinion Enda is an excellent candidate for postgraduate study and I have no hesitation in recommending him for such a programme.

Yours sincerely,

Joe Condon, BA DipStat HDipStat MA PhD
